Surgery of Violence (1975)

Injuries caused by explosive weapons may suddenly present a doctor with urgent, unfamiliar problems in the treatment of the victims. The recent experience of surgeons and physicians at the Royal Victoria Hospital, Belfast, has been drawn upon to provide advice on some important aspects of the surgery of violence. First published as a series of articles in the *BMJ* during February and March this year, they are now collated into a book. Among the subjects the authors discuss are wounds of trunk and limbs, blast injuries of the ear, intensive care, and disaster planning. In addition the book includes a bibliography of 30 recent papers on traumatic surgery written by members of the staff of the Royal Victoria Hospital.

Price £1.00 (U.S.A. $3.00)

Cardiovascular Diseases in the Tropics (1974)

The book presents the present state of knowledge regarding many conditions previously thought to be peculiar to the temperate and developed countries and also deals with those disorders peculiar to the tropical situation. It provides an up-to-date review suitable both for clinical and epidemiological work and for further research into these disorders.

Price £4.50 (U.S.A. $13.50)

Medicine in Old Age (1974)

The series of twenty two articles published in the *British Medical Journal* throughout the winter have been collected in book form as a convenient source of reference for general practitioners. The emphasis is on remedial mechanisms, and the use that can be made of psychogeriatric and social services in keeping the elderly healthy and relatively independent members of the community.

Price £2.00 (U.S.A. $6.00)

Today's Drugs/3 (1973)

The third and and final volume of the 'Today's Drugs' series, like its predecessors, is based on *BMJ* articles revised and brought up to date by their authors. It deals with respiratory agents, drugs acting on central nervous system, and a miscellaneous group of drugs.

Price £1.25 (U.S.A. $3.75)

PERSONAL VIEW
An Anthology

Since the feature started in 1968 PERSONAL VIEW has been one of the most popular pages of the *British Medical Journal*. A hundred of these have now been gathered together in an anthology, to which an introduction has been written by a noted PERSONAL VIEW contributor, Dr. Mahadeva of Ceylon, Sri Lanka. The subjects of the view contained in this anthology range from experience of practice all over the world to work as a schoolteacher, the role of music in medicine, learning to be a farmer's wife, and running a fringe event at the Edinburgh Festival.
